FULL SCENE LIGHTING SOLUTION

G O L F

Extremelight, digital empowerment

ROLEDS Golf series integrates cutting-edge science, intelligent technology, optical innovation, and color mixing technology to enhance outdoor lighting and highlight the strength and beauty of cities. Building on 20 years of independent R&D, this series reflects ROLEDS' unwavering commitment to superior light quality. Empowered by digital manufacturing technologies, the Golf series improves both the performance and stability of lighting products, meeting the evolving demands of global urban development. Its focus is to light up cities, transforming them into vibrant, comfortable, and stylish spaces.

RDO Product Features

1. Ultrasonic glue filling process offers IP67 waterproof performance
2. Mask available in transparent, milky white, and diamond finishes to suit any project
3. Versatile installation methods support customized multi-light series for diverse applications
4. Support 16bit & RDM functions
5. DMX512 dual-wire parallel design, maintaining control even with single-lamp failure
6. Unique optical lenses cater to dazzling scenes
7. Special optical design boosts brightness and lamp efficiency
