SMART PUBLIC LIGHTING

SMART PUBLIC LIGHTING

Over the years, ROLEDS has continuously enhanced its innovation and research capabilities, leveraging intelligent manufacturing to produce smart lighting solutions. Committed to green, low-carbon practices, ROLEDS addresses the need for high-quality, energy-efficient road lighting. By blending artistic and human-centered design, ROLEDS offers comprehensive, full-scene lighting solutions for a variety of public applications.

Various types of light distribution for different scenarios.

The innovative dual-light composite distribution technology effectively addresses glare and light uniformity issues.

Accident warning lighting integrated with a management center for real-time road condition control, reducing secondary accidents.

Standardized models for easy replacement and simple tool-based maintenance.

Personalized design, a streamlined and slim shape, smooth surface.
